25X1A9a  
MEMORANDUM FOR: [REDACTED] 25X1A  
SUBJECT: Saturday Morning Meeting on [REDACTED] 25X1A9a  
REFERENCE: 25X1A9a (a) Truscott paper submitting [REDACTED] Plan for  
25X1A6a (b) Cable on Laboratories [REDACTED] 25X1A  
25X1A9a  
PRESENT: [REDACTED] Dr. Chadwell, Mr. Douglass, Dr. Millikan,  
25X1A9a [REDACTED] Mr. Reber

1. The following agreements were reached:

25X1A9a a. That unless there were extraordinary reasons from the CIA  
25X1A6a Headquarters' viewpoint it would be unwise and probably ineffectual  
to attempt to indicate to [REDACTED] the precise relationship  
to him of either [REDACTED] that as  
a matter of fact he would undoubtedly use the economic staff in an  
advisory capacity comparable to the way in which he now uses [REDACTED] 25X1A9a  
as Head of the Scientific Division, namely, as his right-hand man  
on matters of scientific coordination.

b. That rather than send economic specialists over for a year  
they should go for the regular two years and that Millikan should,  
as necessary, call them back earlier (this would avoid ill-feeling  
on the part of those who had to go for two years).  
25X1A9a

c. That the [REDACTED] in question did not call for approval  
of the recommendations since most of them were manageable by [REDACTED] 5X1A9a  
under his coordinating or Senior Representative authority and that  
only the question of funds and personnel require approval.

2. While the question of providing laboratories for [REDACTED] 25X1A  
was raised no action was taken on it.  
25X1A9a

3. [REDACTED] was assigned the task of preparing a paper for General  
Smith.

NOTE: After the meeting in discussion with O/RR and O/SI it  
became clear that for action purposes the economic and scientific  
questions are separable. Millikan has agreed that he should prepare a

25X1A9a

cable to [REDACTED] sounding him out on his proposed economic staff  
(there being today no T/O for such staff and no topside approval in the  
Agency in principle or as a project). A response to [REDACTED]  
scientific paper is being handled separately. O/SI will consult with  
O/SC on what action should be taken on laboratories [REDACTED]
